

UAE COMPLY.360°

National Compliance made simple, strategic, scalable

UAEComply.360° is a structured, scalable compliance solution designed to help UAE-based entities align with the latest UAE National Cybersecurity Policies and UAE IA Standard v2.0. Delivered through CPX's expert consulting teams, it simplifies governance, accelerates audit-readiness, and enables strategic alignment with the UAE National Cybersecurity Strategy 2025-2031.

PACKAGES DESIGNED TO SUIT YOUR NEEDS

STARTER

- ✓ Common Controls Framework (CCF) Development with cross-mapping between **Mandatory National Cyber Security Policies & UAE IA Standard v2.0**
- ✓ Controls **Gap Assessment** (against the CCF)
- ✓ One-time Risk Assessment + Risk Treatment (in alignment with UAE IA Standard v2.0)
- ✓ **Policy Framework Development / Enhancement**
- ✓ Compliance Roadmap
- ✓ One-time **Policy Framework Awareness** Session for IT / IS Teams

ACCELERATOR

- ✓ Everything in **STARTER +**
- ✓ Extended Risk **Assessment + Risk Register + Risk Treatment** Planning (in alignment with UAE IA Standard v2.0)
- ✓ Controls **Implementation Plan**
- ✓ Policy Framework Operationalization (via Procedures, Processes, Guidelines, etc.)
- ✓ One-time Cyber Awareness Session for **Executive Management**
- ✓ National Information Assurance Platform (**NIAP**) Onboarding

Modular Add-ons

- Cybersecurity Strategy & Roadmap (aligned to UAE National Cyber Security Strategy 2025-2031)
- Cyber Governance, Risk Management, & Compliance Program (vCISO)
- Policy Controls Implementation & Support
- e-GRC platform Implementation & Support services

YOUR BENEFITS

- **Compliance Efficiency:** Streamlined compliance processes and improved audit readiness through a unified control framework and policy alignment.
- **Risk Reduction & Visibility:** Enhanced visibility and management of organizational risks by implementing structured assessments and treatment plans.
- **Cost Avoidance:** Minimized potential financial and operational impact by reducing breach likelihood and compliance penalties.
- **Awareness Impact:** Strengthened human defense by reducing social engineering and phishing risks through targeted awareness programs.
- **Operationalization Gains:** Converted governance frameworks into actionable procedures, improving maturity and reducing repeat audit findings.
- **Technology Enablement:** Automated compliance and reporting workflows, reducing manual effort and improving accuracy through eGRC platforms.
- **Strategic Alignment:** Aligned cyber security posture with national strategies and provided leadership assurance through vCISO-led governance.

DELIVER MODEL

Key Inclusions:

- CCF development and gap assessment
- Risk assessment and treatment planning
- Policy framework creation and operationalization
- NIAP onboarding
- Cyber awareness sessions (IT/IS & Management)
